Goals with complete solutions.

Automatic Energy Drinks Juice Carbonated Beverage Drinks Canning Filling Production

The machine is advanced filling and capping equipment, it's designed on the basis of absorbing domestic and foreign advanced technology. It's mainly used in filling and capping carbonated beverages as soft drinks, cola, sparkling wine, etc. It has such advantages as advanced construction, stable working, convenient operation and repair & maintenance, transducer control as well as high production efficiency. It is the ideal equipment for mid-scale & small-scale beverage factory.

Advantages of Our Filling Machine

- 1) The overall appearance is comfortable, and the window-type structure can be used to keep an eye on the movement of the machine. If there is a problem, the machine can be stopped and checked in time.
- 2) PLC controller, simple and easy to operate, designed for foreign friends, allowing customers to easily navigate.
- 3) The whole machine material is made of stainless steel 304/316, which is very strong and guarantees the quality.
- 4) High filling accuracy and small error, ensuring efficiency while ensuring efficiency.
- 5) Fully automatic production, freeing hands, reducing labor required for production, saving costs and improving efficiency.
